DASSP

Study Guide

DASSP

11 . 12 . 13
SEPTEMBER

Round 1: Chain Reaction

Delegate Count: 2 to 3

DASSP commences this year with Chain Reaction, a round in which every correct answer becomes the key to the next. Each team will be assigned to one station, where they will face a chain of three sequential questions: one from Physics, one from Chemistry, and one from Biology. The entire round for that team will unfold at this single station, within a total of six minutes. As the chain progresses, both the difficulty and the time allotted for each question increase accordingly. Question 1, from Physics, is of Easy difficulty, carries a time limit of one minute, and is worth 10 points. Question 2, from Chemistry, is of Medium difficulty, carries a time limit of two minutes, and is worth 15 points. Question 3, from Biology, is of Hard difficulty, carries a time limit of three minutes, and is worth 20 points.

The maximum possible score for the round is therefore 45 points per team. Delegates will be allowed to attempt all three questions regardless of whether their previous answer was correct or incorrect; however, marks will only be awarded according to the following logic

- If Question 1 is answered correctly, the team earns those 10 points, and Question 2 is thereby unlocked for consideration.
- If Question 1 is answered incorrectly, no marks will be awarded for Question 2 or Question 3, even if those answers are correct.
- Similarly, if Question 1 is correct but Question 2 is incorrect, only the marks for Question 1 will be awarded, and Question 2 and 3 will not be awarded, regardless of its correctness.
- If Questions 1 and 2 are both answered correctly but Question 3 is incorrect, the marks for Questions 1 and 2 will be awarded, while Question 3 will not be awarded.

There is no negative marking in this round; an incorrect answer never results in a deduction of points already earned, only a forfeiture of marks for that question and any question or questions following it in the chain.

Teams must ensure that both required delegates, a minimum of two and a maximum of three, are present at their station before the round begins, as no additional time will be granted to accommodate late arrivals. Only the rough paper, pens, and basic non-programmable calculators, where applicable to the subject, provided at the station may be used; no personal stationery, notes, or electronic devices are permitted. Note: This is an accumulation round. No team will be eliminated. All points earned in this round will carry forward and be added to Round 2 scores to determine advancement to Round 3.

Round 2: Push Your Luck

Delegate Count: 2 to 3

Round 2 asks how far a team's nerve will take it. Welcome to Push Your Luck, a round in which every step higher raises both the reward and the risk. Teams will be called into a room in batches. The same Tier 1 question will be displayed on screen for all teams in the batch simultaneously. Delegates will record their answers on the answer sheets provided to them. Any team that answers correctly may choose either to bank its points and exit the round, or to push forward to the next tier for a tougher question and a greater reward, while any team that answers incorrectly is eliminated from that batch on the spot. This process continues tier by tier, with only the teams that chose to push at the previous tier remaining in the room to attempt the next one. As the tiers progress, both the difficulty and the time allotted increase, and points are only secured the moment a team formally declares that it will bank, rather than push. There is no negative marking in this round; an incorrect answer results only in the forfeiture of unbanked points from that attempt, and never in a deduction below zero.

The three tiers, along with their time limits and point values, are set out below.

- Tier 1: one minute is allotted, carrying 10 points.
- Tier 2: two minutes are allotted, carrying 20 points.
- Tier 3: three minutes are allotted, carrying 35 points.
- Maximum possible score per team: 65 points, plus bonus as detailed below.

Each tier comes with the following rules and bonus opportunities:

- Each team is permitted exactly one hint during its entire climb, usable at any tier of its choosing.
- Using the hint immediately halves the points awarded for that specific tier if answered correctly, rounded down, but does not cause forfeiture of any kind.
- A team that reaches and correctly banks Tier 3 without having used its hint at any point during the climb earns a Jackpot Bonus of 15 additional points on top of its total.
- If a team answers any tier incorrectly, it immediately forfeits all points earned during that attempt, including any tier or tiers answered correctly but not yet formally banked.
- Choosing either Bank or Push will be asked to the delegates once the allotted time for the question is over and their answers are checked on the spot. If the answer of the specific tier is correct, only then will the team have the opportunity to Bank or Push. If the answer is incorrect, the team will be eliminated from Round 2.
- If time expires on a tier while a team is mid decision, it will be eliminated from Round 2.
- All required delegates, a minimum of two and a maximum of three, must be present in the room before their batch begins; no additional time will be granted to accommodate late arrivals.
- Only the rough paper, pens, and basic non-programmable calculators, where applicable to the subject, provided may be used; no personal stationery, notes, or electronic devices are permitted.

Note: This will be an elimination round. Only the top ten teams will advance to Round 3. An aggregate of Round 1 and Round 2 scores will decide which teams move on. In the event of a tie for the tenth qualifying position between two or more teams, a single tie breaker question will be given to all tied teams simultaneously, with one minute to write down their answer, and the team that answers correctly in the shortest time will be ranked highest among the tied teams and will advance.

Round 3:

The final round of DASSP will be a surprise round. Its format, rules, and requirements will be formally announced to all qualifying teams prior to the commencement of the round.

Note: Final decisions, as well as any potential changes, rest in the hands of the category heads.
