Introduction

Within the boundlessly exuberant pockets of Innoventions'26, Minds in Motion isn't just an expertly crafted psychological symposium; it's a scientist's heaven. Ranging from high-pressure trivia rounds to formal advocacy, there quite literally is something for everyone here. And where's the fun without a challenge? This category is not for the faint of heart (quite the opposite, actually). Prove us wrong.

Round 1: Shark Tank

Delegate Count: 2–4

Duration: 2 hours 30 minutes

This round will have two facets:

1. A sustainable pitch;
2. A stall

Upon registration, delegates will receive a problem related to the clinical approach. In a Shark Tank pitching stylization, delegates will be tasked to create a solution for problems allotted to them beforehand and pitch it to the judges in an elimination round. Alongside their solution, delegates will prepare materials for a stall/physical graphic in advance; they will be allowed to display one poster of their prototype and an overview of the product/solution they come up with. It isn't required to be artistic, just representative of what their solution is for the understanding of any passersby or the judges themselves. Delegates will be only provided with a table, they must bring their own materials and printouts.

INNOVENTIONS '26 · INDULGE · INVENT · INNOVATE

Each team is given 5 minutes to present and 2 minutes for a Q&A, no additional marks for a prototype. The poster size should be A1 or A2 maximum. Only the top 8 teams will qualify for the next round on the basis of cumulative points from the aforementioned category requirements.
Note: This is not an elimination category

Round 2: Snap Matching
Delegate Count: 1–2
Duration: 1 hour
Teams will go against each other in a game of Kahoot. They will be presented with different psychology-related scenarios on a screen and must choose the correct research methodology and demand characteristics on their devices. Delegates with a greater streak would earn more points; an incorrect question does not carry any negative points but ends their streak. A quick answer also carries more points.
Delegates will be challenged on:

- Identification of IV and DV
- Experimental designs
- Sampling methods
- Demand characteristics
- Extraneous Variables
- Ethical Issues
- Reliability and Validity

Note: Delegates will be eliminated based on their performance in the first two rounds.

Round 3: The Box
Delegate Count: 2–3
Duration: 12 minutes per team
The top teams will be allotted a case study upon qualifying for a fictional yet realistic psychological investigation and will critically evaluate it in a presentation. Delegates should dissect the case study's methodological weaknesses. They're expected to highlight at least 3 flaws and how it affects the study's conclusions and then propose how they can be resolved. Teams will be given 8 minutes to present and an additional 4 minutes for QnAs.

Round 4: Issues & Debates
Delegate Count: 2–3
Duration: 2 hours
For the final round of the category, teams will go head-to-head in 1v1 debates on classic topics such as 'Nature vs. Nurture' or 'Conscious vs. Unconscious', along with other pre-classified motions. Each debate will follow the standard parliamentary format, with 3 speakers on each side, representing either the proposition or the opposition. Every speaker will be given 5 minutes to argue, alternating back and forth between the proposition and the opposition.
For the finale, speakers will be given 8 minutes per speaker and 4 minutes for a reply. The debate will be structured to allow for both constructive arguments and rebuttals, ensuring an engaging and dynamic exchange. Iron-manning is allowed.

Note: Final decisions as well as potential changes are in the hands of category heads.
